EARTH'S ALLY PRO

DSZSZ

FUNGICIDE & BACTERICIDE

CONTRO

FOR INDOOR, OUTDOOR & GREENHOUSE USE

- KILLS COMMON PLANT DISEASES
- ZERO RE-ENTRY INTERVAL
- LEAVES NO HARMFUL RESIDUE
- PROVEN BEE SAFE*

Active Ingredients	1.07%
Citric Acid	1.07%
Other Ingredients	98.93%
Water, Lactose, Ethyl Lactate, Po	tassium
Sorbate, Sodium Benzoate, Sodiu	m Acetate

Total100.00%

CAUTION: Keep out of reach of children Net Contents 2.5 Gallons (320 fl. oz.)

Shake Well Before and During Use Read Entire Label Before Use

USE FOR ALL PLANTS, TREES, LAWN & TURF:

Orchards, Food Crops, Ornamentals, Houseplants, Lawn & Turf.

FOR ORGANIC PRODUCTION: A new generation of disease control formulated from citric acid, Earth's Ally is an OMRI Listed[®] fungicide and bactericide that kills and prevents common plant and lawn diseases and leaves behind no harmful residue.

FOLIAR DIRECTIONS: Prior to mixing, shake the concentrate well. Dilute the concentrate at 1.2% for both preventative and curative application on plants and trees. Refer to Table for specific rate and treatment interval instructions. For maximum effectiveness, use at the first sign of disease. Avoid application when rainfall is expected with 24 hours. Using a sprayer that emits a fine mist, thoroughly spray the leaves and stems of the plant you are treating until there is runoff. As a curative treatment, spray, wait 4 hours, then repeat application a second time. Repeat this process every 3–5 days, until disease is controlled. As a preventative treatment, apply every 7 days. No limitation on the number of applications per growing cycle. No need to add a wetting agent. For additional safety, avoid use when pollinators are active.

TURF DIRECTIONS: Prior to mixing, shake the concentrate well. Dilute the concentrate at 2.0% for both preventative and curative application on turfgrass. Refer to Table for specific rate and treatment interval instructions. Apply every 7 days when conditions are conducive for disease development. Avoid application when rainfall is expected within 24 hours. Using a ground sprayer, thoroughly saturate the entire treatment area, wetting all soil surfaces. As a curative treatment, spray, wait 4 hours, then repeat application a second time. Repeat this process every 3–5 days, until disease is controlled. As a preventative treatment, apply every 7 days. Recommended spray volume is 2 gallons per 1,000 sq. ft. (or 87 gallons per acre). Complete coverage is essential for disease control. Do not mow or water after treatment until spray is thoroughly dry. SAFE FOR PEOPLE, PETS & PLANET When Used as Directed

FOLIAR: Controls & Prevents Powdery Mildew, Downy Mildew, Blight, Canker, Black Spot, Leaf Spot, Apple Scab, Leaf Curl.

TURF: Controls Brown Patch, Dollar Spot, Anthracnose, Rust.
